WAGNER, MURABITO & HAO LLP				WOJCIECHOWICZ, EDWARD JOSEPH	
	Third Floor	Third Floor			<u> </u>
Two North Market Street				ART UNIT	PAPER NUMBER
	San Jose CA 95113			2815	

DATE MAILED: 11/16/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)				
	10/738,322	FASTOW ET AL.				
Office Action Summary	Examiner	Art Unit				
	Edward Wojciechowicz	2815				
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filled after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply sis pecified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filled, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 31 A	1) Responsive to communication(s) filed on 31 August 2004.					
2a) This action is <b>FINAL</b> . 2b) ☑ This	action is non-final.

## Election/Restrictions

Claims 8-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected method, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 8-31-04.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7, 15-19 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Rodgers. The claimed invention recites a memory cell where a floating gate is formed in the substrate and a bit line is formed within the substrate in proximity to the floating gate. This structure is shown, for example, in Fig. 2 of Rodgers, where floating gate (40) is formed in the substrate and is in proximity to bit line (28) which is also formed in the substrate. In addition, the bit line of Rodgers is in proximity to two adjacent surfaces of the floating gate (see Fig. 1) and can be considered to also be below the wing portions (42) of the floating gate, as well as along one side.

Rodgers also shows a dielectric layer (46) disposed over the floating gate, and a control gate (26) disposed over the oxide layer. Finally, Rodgers also describes a tunnel oxide layer between the floating gate and the substrate, as described at col. 5, I.40.

Art Unit: 2815

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 6 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rodgers, and further in view of Saitoh (6,060,739). While Rodgers also uses polysilicon floating gates, and arsenic doping for the n-type bit lines, he does not explicitly mention the use of an oxide-nitride-oxide (ONO) dielectric layer formed on the floating gate. Saitoh is cited to show that it is well known in the art to form such a dielectric layer on a floating gate, as shown by element (18) in Fig. 13 of Saitoh. One would be motivated to use such a dielectric layer in the Rodgers device because these ONO layers are known in the art to be particularly well suited for use in memory devices.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Wojciechowicz whose telephone number is 571-272-1739. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Thomas can be reached on (571) 272-1664. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
